#1: Use a navigation drawer that contains three elements. (Add Department, Add Employee and List of employees)

#2: When the user clicks on Add Department then Fragment opens and it should include the below widgets:

- Edit Text to add the department name
- Button with text Add

Navigation Drawer Details

Add Department

Add Employee

Employee Details

When the user clicks on the Button then the department should be added in database.

#3: When the user clicks on Add Employee then Fragment opens and it should include the below widgets:

- Imageview (Where need to upload profile pic) - Optional
- Spinner (Which included the list of departments) - Required
- Edit text (Write the name of the employee) - Required

Edit text to write department name

Add

- Button (Add button which will add the detail of employee in DB)

#4: When the user clicks on Employees details then it will open a fragment with a List of employees. It will include - recyclerview.
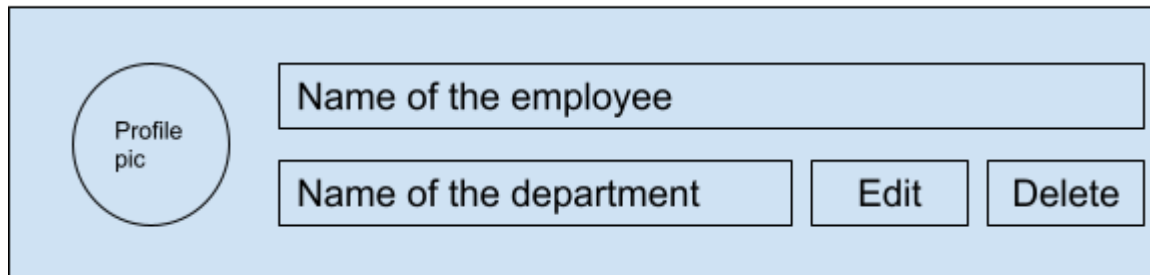

Recyclerview item design

| Profile pic | Name of the employee | | |
| | Name of the department | Edit | Delete |

- The edit button will edit the details of the employee. (Use add employee screen here) - The delete button will delete the details of the employee from the DB.
